About The Seminar

In the present context gender equality and feminist perspective are the most significant aspect of discussion. It is an earnest need that society must be more sensitized towards women issues. The women folk must be provided with better opportunities to lead the society on the path of success.

The road is not easy because the society has to change its mental state where women are considered weaker gender. Our ancient culture venerated women but with the changing span of time the condition of women is detouring. This is the time of over all development in its real meaning. Women are anticipating on the path of success with full vigour and zeal. They are conquering the limit of impossible with their enormous courage and extraordinary mental strength. But not all the women of the society are getting benefits of the opportunities provided by government and still a large number of women-folk are suffering due to various social, political, religious and psychological issues. The aspects seek a devout approach from every segment of the society to establish gender equality among all the area of society. The words of Nobel prize winner Miss Malala Yusuf Zai are very inspiring in the context that "When God created man and women, he was thinking, 'who shall I give the power to, to give birth to the next human being?' And God chose woman. And this is the big evidence that women are powerful."

Women are the most capable gender but their virtues are not recognised. The scenario has to be restructured with the true aspects of gender equality and feminist perspectives.
